Goals
The University of Michigan offers a rigorous and remarkably broad array of graduate and professional degree programs that are among the very best in the country. The University attracts outstanding students to graduate study, and prepares them to make lasting contributions to society through successful careers in professions and academic disciplines. Interdisciplinary study and joint degrees are a special strength of the University. The vibrant community of graduate and professional students on campus is highly diverse in citizenship, demographic background, and intellectual perspective.

Overview
The Horace H. Rackham School of Graduate Studies oversees graduate academic education in partnership with the schools and colleges. In fall 2016, the University enrolled 8,623 students in 121 Ph.D., 159 master's degree, and 42 graduate-level certificate programs offered by the schools and colleges. In addition to obtaining an education, graduate students contribute significantly to the conduct of research, scholarship and teaching on campus. The research enterprise at the U-M benefits enormously from the talent and intelligence of these students.

Another 7,131 students enrolled in fall 2016 in professional degree programs in medicine, law, business, public health, dentistry, pharmacy, nursing, information, engineering, social work and architecture and urban planning. The schools or colleges administer these degree programs in keeping with each profession’s requirements and standards.

The tuition paid by graduate and professional students varies considerably depending on the program. Almost all Ph.D. students and about half of academic Master’s students receive financial support.

Professional degree programs are generally more costly than graduate academic tuition. A large fraction of the students in professional degree programs complete graduate school with loans to repay. Eighty percent of students who recently completed U-M programs in medicine, law and dentistry owe an average of $100,000 or more in student loans.

The Rackham Graduate School collects data on the number of entering graduate students who complete Ph.D. programs Overall, about 73 percent of the students who enrolled in a program between 2001 and 2011 have received a Ph.D. The rates vary somewhat by discipline.

By the time U-M Ph.D. students complete their degrees, a significant fraction will have published scholarly articles in journals or have articles accepted for publication. Since 2007, more than 80 percent of graduates from programs in the biological, health and physical sciences and engineering will have a publication record to include on their CVs. In that same time period, two-thirds of Michigan graduates in the social sciences and one-third of those in the humanities and arts are or soon will be published.

Post-graduation plans vary along disciplinary lines. Ph.D. graduates in the humanities and the arts often find academic positions immediately after graduating. Graduates in the biological, physical and social sciences frequently take a postdoctoral training position before moving into other employment. Industry positions attract a large number of graduates from engineering and the physical sciences. U-M’s international students tend to remain in the U.S. after graduation, probably reflecting the kind and number of opportunities available in this country for those holding advanced degrees.

In several professions, prospective practitioners must pass one or more examinations before becoming a full member of his or her chosen career; U-M students in medicine, law and dentistry have high pass rates.

SOURCE: U-M Student Data.

Total University of Michigan graduate and professional student enrollment has increased to 15,735 in Fall 2016 from 13,125 in Fall 2006. The total enrollment over the past decade peaked this fall at 15,735. The lowest total enrollment of 13,125 occurred in Fall 2006.

Professional program counts include students enrolled in both professional doctorates (i.e. M.D., J.D) and professional master's degree programs (i.e. M.B.A., M.Arch.). A detailed list is found in Appendix D.

\(^{1}\) A list of graduate academic and professional degrees is in Appendix D.
Graduate and professional students comprise about one-third of the total student enrollment.

5.1.2 Graduate Academic and Professional\textsuperscript{2} Student Enrollment by Percent of Total Enrollment for U-M and AAU Public and Private Universities\textsuperscript{3}, Fall 2006-2016.

---

Total University of Michigan student enrollment has increased to 44,718 for fall 2016 from 38,680 in fall 2006, while the total graduate enrollment – academic and professional – increased to 15,735 from 13,125.

U-M professional student enrollment during the last decade was highest in 2011 as a fraction of the total student enrollment. The academic doctoral fraction rose to its highest level in 2010 (the first year of Rackham’s “continuous enrollment policy,” see p. 52), while the academic masters student fraction reached its maximum in 2015. Combined graduate and professional student enrollment as a fraction of the total student body is 0.6 percent greater in 2016 compared to 2006.

The average percentages reported for AAU Private and Public Universities are based on the combined enrollment of graduate academic and professional students compared to the total student enrollment at all levels – undergraduate, graduate and professional.

---

\textsuperscript{2} A list of graduate academic and professional degrees is in Appendix D.

\textsuperscript{3} A list of Association of American Universities (AAU) member institutions is published in Appendix A.
While the total number of graduate and professional students has grown from 8,916 in 1960 to 15,735 in 2016, the fraction of the total student body on the Ann Arbor campus that they represent has varied by less than five percent.

5.1.3 U-M Graduate Academic and Professional Student Enrollment Headcount, with Percent of Total Enrollment, for Selected Years from 1960 to 2016.

SOURCE: U-M Student Data Sets.

In the chart, the number inside each column represents the total enrollment of graduate academic and professional students in the fall of that year. Over the last 50 years, Ann Arbor campus enrollment increased by about one graduate student for every two additional undergraduates.
The largest academic doctoral enrollment at U-M is in the College of Literature, Science & the Arts, while the most master's students are enrolled in the College of Engineering. Michigan's largest professional program is the M.B.A. in the Stephen M. Ross School of Business.

5.1.4 U-M Graduate Academic and Professional Student Enrollment by School/College and Degree Sought, Fall 2016.

</table>

These cost figures represent the published rates, although many students in these programs receive financial aid, which translates to a lower net price. Unless otherwise indicated, students usually attend school for two semesters per academic year.

Several schools and colleges offer specialized degrees and joint degree programs that are not listed above. The Registrar’s Office posts tuition and fees for these programs at [ro.umich.edu/tuition/](http://ro.umich.edu/tuition/).
The inflation-adjusted tuition and required fees ("sticker price") for both in-state and out-of-state Ph.D. pre-candidacy students increased by nearly 50 percent from FY1998 to FY2018. However, as shown in chart 5.5.1, more than 90 percent of Ph.D. students receive tuition stipends or other financial support.

5.2.2 Graduate Academic Student Tuition and Required Fees, Adjusted for Inflation\(^4\), per Semester, FY1998-FY2018.

The chart represents tuition and required fees for graduate academic students in the College of Literature, Science and the Arts; School of Information; and College of Pharmacy. Rates vary for students enrolled in other graduate academic programs. (See chart 5.2.1)

Effective Fall 2010, tuition and required fees paid by Ph.D. candidates declined by $1,760 per year (dotted line). This reduction occurred at the same time that the U-M instituted a continuous enrollment policy for Ph.D. students.\(^5\) The policy calls for these students to register in every fall and winter semester until they complete their degrees, unless they are on approved leaves of absence. The policy is designed to improve the likelihood that students will complete their Ph.D. degrees, without imposing any new financial burden on students or graduate program budgets.

\(^4\) Based on the FY2018 U.S. Consumer Price Index (as estimated by the U-M Research Seminar in Quantitative Economics).

\(^5\) The policy calls for these students to register in every fall and winter semester until they complete their degrees, unless they are on approved leaves of absence.
The inflation-adjusted tuition and required fees for the M.B.A. and Law degrees increased more rapidly over the last 20 years than for other professional degrees offered by the U-M.

5.2.3 Graduate Professional Student Tuition and Required Fees, Adjusted for Inflation\(^5\), In-State per Semester, FY1998-FY2018.

![Graph showing tuition and fees for various programs.]  
Source: UM Registrar.

5.2.4 Graduate Professional Student Tuition and Required Fees, Adjusted for Inflation\(^5\), Out-of-State per Semester, FY1998-FY2018.

![Graph showing tuition and fees for various programs.]  
Source: UM Registrar.

\(^\dagger\) Starting in Fall 2011, D.D.S. students paid tuition three times per year instead of two, with the per-semester rate adjusted downward to be comparable with the previous annual total.

\(^5\) Based on FY 2018 U.S. Consumer Price Index (as estimated by the U-M Research Seminar in Quantitative Economics).
The U-M awards more graduate academic and professional degrees than any other Big Ten institution.

5.3.1 Graduate Master’s, Academic Doctorate and Professional Doctorate Degrees Awarded, Headcount for U-M, Peers* and Big Ten Universities, 2014-15

**SOURCE:** Integrated Postsecondary Education Data System (IPEDS).

The University of Michigan grants the academic doctorates Ph.D. and D.Mus.Arts. and the professional doctorates M.D., J.D., D.D.S., Pharm.D., and D.N.P.

6 A list of the “official” peers used for comparison in the top group on this page is found in Appendix A. Big Ten universities are in the bottom group.
The U-M is a top producer of STEM Ph.D. graduates compared to its peers.

5.3.2 Ph.D. Degrees Awarded, Headcount (top) and Percent (bottom), by Discipline Group\(^7\) for U-M, Peers and Big Ten Universities, 2014-15.

SOURCE: Integrated Postsecondary Education Data System (IPEDS).

\(^7\) A list of disciplines assigned to each group is found in Appendix C.
In the life sciences, physical sciences and engineering – also known as STEM fields (science, technology, engineering and mathematics) – U-M awarded 574 Ph.D. degrees in 2014-15, more than any of its peers for the academic year. The number of graduates in STEM fields is important because some analyses indicate that the American workforce will need to add about one million more STEM professionals over the next decade than the U.S. will produce at current rates.8

To keep the comparisons consistent between U-M and the other schools included here, we assigned all degree awards for Charts 5.3.2, 5.3.3 and 5.3.4 at the peer and Big Ten universities to the same academic disciplines and professional categories as the U-M uses, even if other schools might assign the programs differently on their campuses.

8 “Engage to Excel: Producing One Million Additional College Graduates with Degrees in Science, Technology, Engineering, And Mathematics,” President’s Council of Advisors on Science and Technology (PCAST), February 2012.
Half of U-M’s Master’s degrees are in STEM fields.

5.3.3 Academic Master’s Degrees Awarded, Headcount (top) and Percent (bottom), by Discipline Group for U-M, Peers and Big Ten Universities, 2014-15.

SOURCE: Integrated Postsecondary Education Data System (IPEDS).

9 A list of disciplines assigned to each group is found in Appendix C.
Among the academic Master’s degrees awarded in 2014-15, 2,121 U-M students graduated in the sciences, technology, engineering or mathematics. Among U-M’s peers, only Columbia (2,770) awarded a higher number of Master’s degrees in these fields.

To keep the comparisons consistent between U-M and the other schools included here, we assigned all degree awards for Charts 5.3.2, 5.3.3 and 5.3.4 at the peers and Big Ten universities to the same academic disciplines and professional categories as the U-M uses, even if other schools might assign the programs differently on their campuses.
The U-M grants a large number of professional degrees compared to most peer universities.

5.3.4 Professional Degrees Awarded, Headcount (top) and Percent (bottom), by Program for U-M, Peers\textsuperscript{10} and Big Ten Universities, 2014-15.

\textsuperscript{10} A list of the “official” peers used for comparison in the top group on this page is found in Appendix A. Big Ten universities are in the bottom group.
The U-M awards degrees in five professional programs: Law, Medicine, Dentistry, Pharmacy, and Nursing Practice (D.N.P.).

The “Other” category includes professional degrees not offered by the U-M, such as in Veterinary Medicine, Optometry, Osteopathic Medicine, Communication Disorders, and a few other specialized health areas.

To keep the comparisons consistent between U-M and the other schools included here, we assigned all degree awards for Charts 5.3.2, 5.3.3 and 5.3.4 at the peers and Big Ten universities to the same academic disciplines and professional categories as the U-M uses, even if other schools might assign the programs differently on their campuses.
The profile of U-M doctoral student graduation rates in recent years is fairly consistent across the disciplines. Overall, 73 percent of students who enrolled in a doctoral program on the Ann Arbor campus between Spring term 2001 and Winter term 2011 have graduated with a Ph.D.

SOURCE: Horace H. Rackham School of Graduate Studies.

This chart examines a range of doctoral entry cohorts and shows the number and percent of each cohort that have completed their degrees, or are still enrolled, as of August 31, 2016. Furthermore, a recent report by the Rackham School of Graduate Studies shows that 79 percent of Ph.D. students who first enrolled between 2005 and 2010 have completed their doctoral degrees or are on track to do so in a timely manner.¹²

¹¹ A list of disciplines assigned to each group is found in Appendix C.

Eighty seven percent of students who enrolled in U-M academic Master's programs on the Ann Arbor campus from Spring term 2012 through Winter term 2015 have completed their degrees.

5.4.2 Academic Master's Completion Rates by Discipline Group\textsuperscript{13}, Enrollment Cohorts 2012-2015.

SOURCE: Horace H. Rackham School of Graduate Studies.

U-M Master’s programs usually require about two years to complete, so the average in the headline does not take into account the completion counts for the Master's students who first enrolled in the Fall 2015 term.

\textsuperscript{13} A list of disciplines assigned to each group is found in Appendix C.
Ninety-eight percent of Rackham graduate students pursuing Ph.D. degrees receive financial support from the University.

5.5.1 Funding Support for Rackham Ph.D. Students\textsuperscript{14}, 2015-16.

In all fields of study, a large fraction of academic Ph.D. students receives both tuition grants and a stipend to help cover living expenses. In many cases, students competed successfully for external funding and did not need additional financial support. Stipends may be paid as part of an appointment as a Graduate Student Instructor (GSI), Graduate Student Research Assistant (GSRA), Graduate Student Staff Assistant (GSSA), or as a fellowship.

\begin{itemize}
\item **All Rackham Ph.D. Students** (4,893 students)
\item **Biological & Health Sciences** (876 students)
\item **Social Sciences** (1,194 students)
\item **Physical Sciences & Engineering** (2,237 students)
\item **Humanities & the Arts** (586 students)
\end{itemize}

\textup{SOURCE: Horace H. Rackham School of Graduate Studies Student Funding Reports.}

Percentages might not sum to 100% due to rounding.

\textsuperscript{14} A list of disciplines assigned to each group is found in Appendix C.
Financial support provided to Rackham students pursuing Master’s degrees varies by field of study.

5.5.2 Funding Support for Rackham Master’s Students\(^\text{15}\), 2015-16.

The five categories of support (No Support, and covering 1%-25%, 26%-50%, 51%-75%, 76%-100% of costs) represent the fraction of the total calculated cost of attendance provided as tuition grants and stipends to students enrolled in Master’s programs. Loans that Master’s students may acquire are not included in these calculations.

SOURCE: Horace H. Rackham School of Graduate Studies Student Funding Reports.

Percentages might not sum to 100% due to rounding.

\(^{15}\) A list of disciplines assigned to each group is found in Appendix C.
Three-fifths of U-M Ph.D. students graduate without any student loan debt.

5.6.1 Self-reported Cumulative Undergraduate and Graduate Debt by U-M Ph.D. students at Graduation, by Discipline Group for Domestic Students, FY2005-FY2015.

Fewer than half (41% over the time period shown) of University of Michigan Ph.D. students graduate with student-loan debt that was acquired over the course of their undergraduate and graduate careers. The aggregate averages of Ph.D. graduates with debt by discipline groups vary: Life Sciences (46%), Physical Sciences & Engineering (31%), Social Sciences (48%), Humanities & the Arts (52%).

The issue of student debt remains important to the University of Michigan and higher education overall. Student loan debt presents a serious challenge to scholars just starting their careers, especially for the small number of students in the life sciences, physical sciences and engineering and social sciences who have accumulated student loan debt that exceeds $100,000.

16 A list of the disciplines assigned to each category is in Appendix C.
After adjusting for inflation\textsuperscript{17}, the level of student loan debt for M.D. graduates is high, but somewhat stable over the last several years. D.D.S. graduates have exhibited an increase in total debt after a three-year drop, while debt has steadily increased for J.D. graduates.

5.6.2 Graduate Professional Students’ Self-reported Debt at Graduation, by Program, 2006-16.

\textbf{Average Debt at Graduation} \quad \textbf{Average Debt, Adjusted for Inflation}

\caption{Graduate Professional Students’ Self-reported Debt at Graduation, by Program, 2006-16.}
\end{figure}

\textbf{SOURCE:} School Dean or Financial Aid Office.

Between 80 and 90 percent of professional degree graduates have student loan debt when they complete their programs. For all programs, the debt averages are calculated based only on students with student-loan debt.

The debt acquired by professional students is a matter of national concern. For instance, the likelihood of incurring sizeable debt to attend a professional school may contribute to the relatively small proportion of under-represented minorities enrolled in these programs at the University (see Chart 8.6.1).

\textsuperscript{17} Based on the FY2016 U.S. Consumer Price Index.
A large fraction of Ph.D. graduates in the physical sciences and engineering go into private or non-profit sector jobs. Ph.D. graduates in the other discipline groups tend to move more toward higher education positions.

More than half of academic Ph.D. graduates in the biological and health sciences enter post-doctoral training during the first year following graduation. As time since graduation passes, many of the post-docs move into academic positions in higher education or take jobs in industry, government or the non-profit sector.

About the same number of academic Ph.D. graduates in the physical sciences and engineering initially take a position outside of academia as enter post-doctoral training. By five years after graduation they are primarily taking jobs in industry, government or the non-profit sector, or entering academic positions.

Blue shades represent higher education positions, reds indicate post-doctoral or other post-graduate training, greens are positions outside of higher education, and the grays represent unknown activity or not currently employed.

\(^{18}\) A list of disciplines assigned to each group is found in Appendix C.
5.7 Placement outcomes for U-M Ph.D. Students, by Discipline Group\(^{19}\), FY2003-FY2016 (continued).

More than two-fifths of academic Ph.D. graduates in the social sciences enter a higher education position during the first year following graduation, with about two-thirds of these on the tenure-track. By the fifth year post-graduation, about half of U-M’s social science Ph.D. graduates has tenure-track positions, and another 17 percent hold non-tenure-track positions at a college or university.

Ph.D. graduates in the humanities and arts are less likely to pursue postdoctoral training than their counterparts in other disciplines. About one-fourth of humanities and arts Ph.D. graduates are on the tenure track initially, and the fraction more than doubles by ten years post-graduation.

Blue shades represent higher education positions, reds indicate post-doctoral or other post-graduate training, greens are positions outside of higher education, and the grays represent unknown activity or not currently employed.

\(^{19}\) A list of disciplines assigned to each group is found in Appendix C.
U-M Ph.D. programs are attractive to students from all geographic locales.

5.8.1 Geographic Origins of U-M Ph.D. Recipients, Headcount (top) and Percent (bottom) by Discipline Group, FY2005-FY2015.

The large number of international students enrolled in physical science and engineering Ph.D. programs is not a surprise, given the attractiveness of these kinds of programs. According to a 2012 National Science Foundation report, international students comprise 30 percent of U.S. graduate science and engineering programs. For the decade displayed here, international students make up 50 percent of total enrollment in U-M physical science and engineering Ph.D. programs.

A list of disciplines assigned to each group is found in Appendix C.

A comparison of geographic origins (5.8.1) and destinations (below) of U-M Ph.D. students illustrates that a large proportion of international students remain in the U.S. after graduation.

5.8.2  Geographic Destinations of U-M Ph.D. Recipients, Headcount (top) and Percent (bottom) by Discipline Group\textsuperscript{22}, FY2005-FY2015.

The U.S. Medical Licensing Examination is administered by the National Board of Medical Examiners in several parts: Step 1 exam at the end of the second year of medical school, both Step 2 exams (CK=Clinical Knowledge, CS=Clinical Skills) during the fourth year of medical school, and Step 3 exam 1-2 years after graduation. The pass rates are computed based on first-time takers of each segment.
