### The U-M experience in students' own words

"My professors teach me information, but expect me to be able to apply it in novel situations...My peers constantly cause me to question my viewpoints and to see things in a new light, and the amount of personal growth that I've experienced in the last four years due to my peers is not something I feel I could gain elsewhere. The opportunities and genuine desire to involve undergraduate students in research and other important endeavors is unmatched by most other universities. I am a graduating senior and am going to miss UM very much."  
-Senior, Literature, Science & the Arts

"I would not be able to attend and now graduate from the University of Michigan without its financial aid package in the Go Blue Guarantee."  
-Senior, Engineering

"I think that the value of a UM degree is the level of respect it carries. I know that I can walk into any job interview and be sure that the interviewer will know the UM name and respect the level of education I received."  
-Sophomore, Ross School of Business
